

CCI Driving Manufacturing Productivity For Over Two Decades

Event Logging

The Five W's

ISO9000 Needs to Know!

If you're truly maintaining ISO9000 tractability you are required to record all changes to any File, Document or Packet which includes the who, what, when, where and whys.

Configure Event Capture

SuiteFactory allows customers to configure its database to be ISO9000 compliant and capture these important selected Events.

Configurable Report Generator

SuiteFactory provides a customer configurable report generator that uses these Events for generating reports which details the Five W's needed to be ISO9000 compliant.

This configurable report generator includes: Date/Time; User; Specific File/Document/Packet, etc.

Edit Pick List

List of Reasons

SuiteFactory allows you to create a list of reasons for making changes or responding to various Events for its Files, Documents and Packets.

Free Style Reason

You can provide a free style reason if a pick list reason is not adequate.

Manage Reason Lists

Custom created reasons can be sorted and maintained as active or retired.

Select Event Reasons

SuiteFactory allows you to configure which Events to capture and prompt a User to record the reason for the any change due to this Event.
