**InternationalLanguage™ PDF Version**  
**A ShopFloorManager Module for International Language Management**  
**You can Create, Modify, Save and/or Import any Language or Dialect**  
**Part of an Integrated Family of ShopFloorManager™ EventAware™ Modules**  
**Supports Windows 8™, Windows 7™ & Windows™ XP including Support for Terminal Server 2003/2006/2008**

InternationalLanguage™ is a ShopFloorManager Module Designed so a User of ShopFloorManager can Create, Modify, Save, Import and/or Export any Language or Dialect of any Country. You don't have to recompile the changes as they are instantly available after modification.

InternationalLanguage provides the ability to have the Original Text Side by Side with the New Text so there is no confusion with the changes you are making! No matter what you can always go back to the original when needed.

As an example you can change the name of any ShopFloorManager™ CNC or DNC Menu to suit your tastes and the Language Management Module will save those changes to your local system and if you would like to create a whole new local Language and package the "New" Language so you can email the Language Version then back to CCI for inclusion into its future releases.

**InternationalLanguage™ For Creating a Local Dialect and/or Modifying your Language Easily!**

Have you ever want to change an Application Menu? Have you ever wanted to create a different dialect? Have you ever wanted your CNC Application to be in a different Language? Use ShopFloorManager's InternationalLanguage and you can accomplish all those needs!

<b>Standard</b>	<b>InternationalLanguage™ Configurable Settings Allow:</b> <ul style="list-style-type: none"> <li>• Displaying Menu Normally</li> <li>• Displaying Menu as Resource ID Useful for Menu &amp; Text Searches</li> <li>• Displaying as English Menu</li> <li>• Displaying as English with Resource ID Useful for Menu &amp; Text Searches</li> <li>• Displaying as Local Language with English</li> <li>• Displaying as Local Language with English with Resource ID Useful for Menu &amp; Text Searches</li> </ul> <p><b>Note:</b> A Resource ID is used for looking up a Menu or Text using InternationalLanguage!</p>
<b>Configuring A Language Dialect</b>	<b>InternationalLanguage™ Allows a User to Enter and/or Modify Languages:</b> <ul style="list-style-type: none"> <li>• Side by Side Default as Modified Text/Menu</li> <li>• Search by Resource ID/Resource with a Particular Menu/Text</li> <li>• File Merge Translation</li> <li>• Edit Resource ID/Associate with a Particular Menu/Text</li> <li>• Edit Resource ID Translation</li> <li>• Delete Resource ID Translation</li> </ul> <p><b>Note:</b> You can always recover the default translator!</p>
