CCI Driving Manufacturing Productivity For Over Two Decades

Docs & Packets

Paper Traveler

The old Shop Floor Paper Traveler contained documents, files, quality instructions, manufacturing instructions and included a set of sequential work process that were used to manufacture a part.

Operation

The Traveler contained paper work that detailed the various individual processes (operations) that were to be followed in order to manufacture the part to the drawing and specifications.

Approval of Processes

These processes were usually approved by Quality Engineering, Manufacturing Engineering and Manufacturing.

In-Production Changes

Whenever there were changes to an operation it became a real hassle to modify/replace these paper

operations on the shop floor.

Packets are the Solution

SuiteFactory's Packet provides all of the benefits of the paper traveler without any of the hassles by providing single point of control for modifications and approval.

Packet File Categories

SuiteFactory's Packets provide three categories for all of you file types: DNC; Controlled Documents and Uncontrolled Documents.

ISO9000 Protection

DNC files and Controlled Documents are maintained in SuiteFactory's Database so you can provide ISO9000 control and protection.
