

ShopFloorManager Tech Notes
"Creating Third-Party Tools" for Securing Third-Party Data [PDF Version](#)
Third-Party Tools "Integrating" External Applications & Data into ShopFloorManager's Database
Supports Windows 4*, Windows 7* & Windows* XP including Support for Terminal Server 2003/2009/2008

ShopFloorManager provides a Channel for Integrating Third-Party Applications & Data into ShopFloorManager's Suite of Applications. Suppose you have a favorite Editor, Backplotter, DNC Converter or perhaps you would like to make the Microsoft Suite of Applications a part of ShopFloorManager.

Using ShopFloorManager's Third-Party Tools you can in a matter of minutes integrate virtually any Shop Floor Application into ShopFloorManager to either expose the data in ShopFloorManager to Third-Party Applications or use the Third-Party Applications to modify the data and store this data in ShopFloorManager's secure database or both.

Third-Party Tools: Accessing Third-Party Applications and Managing & Protecting It's Data

Optional: Third-Party Tools Reacting Out to your External Applications

Select the Third-Party Application to Integrate with ShopFloorManager:

Enter the Name of Third-Party Tool to Display:

Edit the Command Line Arguments:

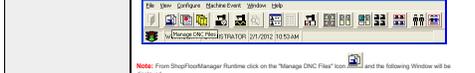

Note: These are the arguments required by Microsoft compatible Applications and normally you don't have to change anything. Call CDD if your Application is non-Microsoft Compatible or has different requirements.

Click on the User Groups' icon:

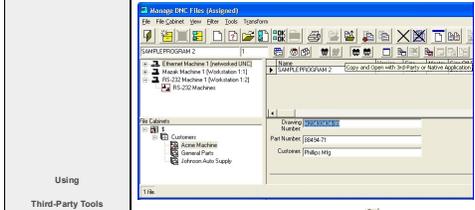

Select User Groups:

ShopFloorManager Runtimes

ShopFloorManager Manage DNC Window

The Window above is just one of many different "Views" of File Relationships. To select other "Views" click on the Change View icon and select from the various options for viewing the FileData Relationships that best fit your needs.

To Backplot

Show all Color (Change) Home Substrate not found

Substrate Cycle Off Mode (Make Core) Outline Center Home Home Home

Note: You can link to as many Third-Party Applications as required while securely storing its files in ShopFloorManager.
What we have shown is just the ability to display a "File" but ShopFloorManager allows you to use the Third-Party Tools to Link to External Applications for supplying the selected Files and storing them back into ShopFloorManager when you are finished. While you are editing these Files with the Third-Party Applications ShopFloorManager will make sure that nobody else can modify the File you are editing!
